

**Job title**

Cable Puller / Technician

**Company name and postcode**

V25AGE COMMS LTD

**Job summary**

(Outline of the job description including key responsibilities and detail of the skills the young person will develop and details of homeworking. Please provide as much detail as possible Please do not use bullet points)

This role will be working as part of an experienced team of cable pullers / technicians working on public highways / footpaths and private space.

Company overview - we are a family run business, working on many contracts delivering fibre and telecommunication services across the country, primarily Yorkshire. Works include proving ducts within the highway / footways, installing sub-duct and installing fibre, fibre blowing, splicing, terminating and testing works to ensure customers have connectivity to broadband / telecommunications and fibre to the home across the country. We also carry out small civils works clearing blockages so the opportunity to gain experience in this area could also be a possibility.

The role is very physical and the successful candidate needs to have great self awareness and pay particular attention to H&S to ensure you remain safe at all times whilst working near public highways.

You will need to be physically fit, not scared of hard work, have a can do positive attitude and not afraid to get your hands dirty. You will be a team player and be professional when dealing with members of the public and other contractors working on site.

Whilst in this role you will undertake training to allow you to work on BT networks. You will also undertake some online training including manual handling, risk assessment awareness, COSHH awareness and other online training.

Other training may be available for the right candidate that shows the right mindset to help develop your skills further. In addition to recognised training undertaken you will also receive valuable on the job training and expertise in rodding and roping underground ducts, installing sub-duct and pulling in fibre optic cables.

This is an excellent opportunity for the right person working within a professional but friendly family run business.

**Essential skills, experience and qualifications** (please do not use bullet points)

You will have a can do attitude, be conscientious and physically fit and able to carry out manual work

No experience is necessary but you will not be scared of hard work or getting your hands dirty.

A drivers license is not essential in this role as you will have the ability to travel with other members of the team

You must be a team player and the ability to give and take banter within the team would be a bonus

**Job category (DWP use only)**

**Number of hours per week**

37

**Working pattern and contracted hours** (including any shift patterns)

Monday to Friday - working hours vary dependent upon job completion  
Some days will finish earlier / some later

Start time normally circa 7am

**Hourly rate of pay**

National Minimum Wage

**Details of employability support** (training opportunities/mentor)

The successful candidate will receive on the job training and mentoring across a wide range of fibre installation and minor civils works.

SA002 Underground Safety - 1 day course

S007 PIA Sub-duct and Cable Installation - 2 day course

Various online training including manual handling, risk assessment awareness, COSHH awareness

Potential for other training for candidates showing the right attitude
